CEO Statement

Ortivus' customer deliveries continue at a high pace

Revenues for Ortivus during the quarter amounted to 25.3 MSEK, which is a growth of 144% compared to the corresponding period in 2019. Furthermore, Ortivus report a positive result after tax of 1.2 MSEK. The gross margin is lower than in the corresponding quarter last year, as the product mix continues to be mainly hardware at this early stage of customer deliveries. Ortivus has a reported cash flow of -4.7 MSEK and 28.4MSEK in cash and cash equivalents. The company is free of debt.

Our international projects continue to run according to plan with faster deliveries than expected despite Covid-19. It is mainly a hardware delivery of 12.0 MSEK, to the South Central Ambulance Trust that dominates the quarter's sales. In addition to hardware, parts of newly developed functionality in MobiMed ePR has also been delivered.

In our Northern Ireland project, the plan is to start operations during the first quarter of 2021 and our project delivery to the South Western Ambulance Trust has begun and is expected to continue over the next 6-9 months.

In 2019, Ortivus signed a contract with ST Engineering in Singapore with an order value of almost 26.0 MSEK. Since then, Ortivus and ST Engineering, have worked together to adapt MobiMed ePR to

Android's software platform for delivery to Singapore's primary and emergency care. During the quarter, a milestone was passed in the project as the new software was approved for contracted functionality. The next step is now to gradually launch the system, which will happen over the next 6-8 months. The developed software will be launched throughout Singapore.

Our solutions used in the British market have aroused interest from new international customers, with initial discussions underway.

In Sweden, a new software version for the integration of MobiMed with Cambio's hospital record system, Cosmic, was completed during the quarter. Cambio Cosmic currently has agreements with 17 out of 21 Swedish regions. Delivery and commissioning of new monitoring units for primary care in Jämtland-Härjedalen and Västmanland continues, and we are gradually creating new user references for further market positioning in Sweden.

During the quarter, we also began communicating our new offer of MobiMed packaged with an external defibrillator. The news has been well received, as many are looking for a complete solution that is also modular. The offer strengthens Ortivus' position on the market and we see increased interest in our solutions.

Inission, formerly Sweco, has been contracted by Ortivus for production, storage and reparations of MobiMed monitoring equipment since 2007. A decision has now been made to move these operations to the company's own premises. Ortivus faces a strong growth phase and we see both strategic gains and positive synergy effects with product development, integrating these operations in Danderyd. Ortivus' current premises will be upgraded and adapted to handle both storage, reparations, and production. Recruitments of new personnel to manage these functions are ongoing, and operations that are currently run by Inission will gradually be transferred to Ortivus during Q1 2021.

During the thrid quarter, we have continued to strengthen the organisation to meet the growing need for our solutions. Over the last year, we have made 9 new recruitments and today we are 31 employees in Sweden and the United Kingdom. However, the second wave of Covid-19, which is now affecting many countries, is increasing the pressure on healthcare personnel. This means that certain delivery projects might be delayed at the customer's request, but also that the customers' opportunities to resource procurements are affected. The demand for Ortivus' solutions is nevertheless still high, and we are proud to see how MobiMed facilitates healthcare, especially in times like these.

We look forward to continued successful collaboration with both ambulance care and primary care!

Important estimates and assessments

Ortivus assesses that there are no estimates in the current financial statement that are associated with significant risk of notable changes in the reported amounts.

The following text describes important estimates that are associated with risk of changes in the reported values, but where the risk is not significant or where the possible adjustment is not notable or where it is not expected to affect reported values in the coming year.

Value recovery of development expenditure

The risk that balanced development expenses would not be recovered is dependent on future market potential for the developed products as well as prices and manufacturing costs that form the basis for estimates and calculations made before each development project is initiated.

Alterations in these conditions could have a significant impact on the carrying amount of the project, presented in the consolidated balance sheet.

Revision

This report has not been reviewed by the company auditors.

Forward-looking statements

All forward-looking statements in this report are based on the company's best assessment at the publication time. Such statements comprise, like all future assessments, risks and uncertainties, which may mean that the actual outcome will be different. In addition to what is required according to current legislation, forward-looking statements only apply the day they were made and Ortivus does not undertake to update any of them in case of future events or if new information is obtained. Ortivus makes no forecasts.
